Comments submitted by Mr. Dale G. Kalina, Director of EHS Regulatory Affairs, on R.R. Donnelley & Sons Company Draft Title V Air Quality Permit.

Permit

1. The legal company name is R.R. Donnelley & Sons Company, with an ampersand (“&”) rather than the word “and”. Please make the change to the name in the permit.

Division’s response: Comment acknowledged, change made on the cover page.

2. Please correct the mailing address to the Danville site on the cover page, not the Bolingbrook address as currently shown.

Division’s response: The Division has revised the permit as requested by the source.

3. The VOC emissions limit for press KDM-888 in Permit V-05-037 is 40 tons. As this press is not part of the project for which this permit is being issued, the limit should remain unchanged. Please correct the emissions limit for this press permit on page 7 to previous value of 40 tons, not the reduced value of 36 tons as indicated.

Division’s response: Comment acknowledged, but no change was made. The VOC emissions limit for press KDM-888 in Permit V-05-037 is 36 tons not 40 tons and remains unchanged at 36 tons per year.

4. As noted in the permit application, Press KDM-892 is equipped with two dryers. Please revise the description of this press on page 13 to read “Two Contiweb Ecoweb Plus One Hot Air Dryers”

Division’s response: The Division has revised the permit as requested by the source.

These comments ask for minor changes and do not require another public notice.
